

GOAL #3 - TRANSPORTATION

Transportation continues to be both a primary service provided by PSA2AAA and an ongoing unmet need of great proportion (primarily due to limited funding and the remote geographical area which promotes isolation).

RATIONALE

PSA2AAA will continue to focus in the attempt to meet the need of transportation throughout the major populated areas of the 5-county region through new and creative energies as indicated below.

FY 09/10 OBJECTIVES

- A. The Advisory Council Legislative Committee will lobby transportation issues for the benefit of the PSA2AAA through auspices such as the California Senior Legislature (CSL), and other legislative avenues. This will occur throughout FY 09/10.
- B. The PSA2AAA Advisory Council will participate in CALAct Transportation and Association for rural providers and will advocate for the availability of better senior transportation to fit our rural needs. This will occur throughout FY 09/10.
- C. The CSL Representative and Senator will educate the Advisory Council how to impact the community to increase transportation resources.
- D. The Advisory Council will identify resources in the community to collaborate with, such as Independent Living Council, Far Northern Regional, and other groups supporting transportation for the disabled.
